Course objectives :

In this course we plan to give students an overview of the field of Cloud Computing, and an in-depth

the fundamental ideas behind Cloud Computing, the evolution of the paradigm, its applicability;benefits, as well as current and future challenges;

the basic ideas and principles in data center design; cloud management techniques and cloud software deployment considerations;

different CPU, memory and I/O virtualization techniques that serve in offering software, computation and storage services on the cloud; Software Defined Networks (SDN) and Software Defined Storage (SDS);

cloud storage technologies and relevant distributed file systems, NoSQL databases and object storage;

the variety of programming models and develop working experience in several of them.

Resource Person :- Mr. Manish Girase

Coordinator :- Prof. Yogeshwari Hardas 9158770776

Course outcomes :

The primary learning outcomes of this course are five-fold. Students will be able to:

1) Explain the core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics, advantages and challenges brought about by the various models and services in cloud computing.

2) Apply fundamental concepts in cloud infrastructures to understand the tradeoffs in power, efficiency and cost, and then study how to leverage and manage single and multiple datacenters to build and deploy cloud applications that are resilient, elastic and cost-efficient.

3) Discuss system, network and storage virtualization and outline their role in enabling the cloud computing system model.

4) Illustrate the fundamental concepts of cloud storage and demonstrate their use in storage systems such as Amazon S3 and HDFS.

5) Analyze various cloud programming models and apply them to solve problems on the cloud

Add on course on cloud computing

A Five day certified course

26 th -30 th AUG 2019

oraganised by

Department Of Computer Engineering

Vishwatmak Om Gurudev College of Engineering

[Affiliated to MSBTE, Mumbai , Approved by AICTE, New Delhi & DTE, M.S.]
At : Mohili , Post : Aghai , Via Kalyan , Dist. : Thane , 421301

Course Pre-requisites :

- Pre-requisites for undergraduate students: A "C" or better in 15-213.
- Pre-requisites for graduate students: Knowledge of computer systems, programming and debugging, with a strong competency in at least one language (such as Java/Python), and the ability to pick up other languages as needed

Cloud Computing Architecture

Career Prospects :

Students will work in teams to design and implement a complete web-service that uses the REST interfaceto respond to queries that require running an analytics job on a large (1TB) twitter data set which is stored in a database (MySQL, HBASE, etc.). In this team project, student teams are expected to use differenttools and services to achieve build a performing web-service that meets the requirements. The students'web-services are evaluated through a load generator for a fixed time period (several hours) by measuring the cost of AWS cloud resources used and their system's performance (throughput). There is an upper bound on the budget which could cause students to be disqualified. Students are evaluated based on how their service performs compared to a baseline.

Course Contents :

• Definition and evolution of Cloud Computing.Enabling Technologies, Service and Deployment Models, Popular Cloud Stacks and Use Cases.Benefits, Risks, and Challenges of Cloud Computing.	8 Hrs
• Topics in Cloud Security.Historical Perspective of Data Centers. Datacenter Components: IT Equipment and Faciliti. Design Considerations: Requirements, Power, Efficiency, & Redundancy.	8Hrs
• Power Calculations, PUE and Challenges in Cloud Data Centers Virtualization (CPU, Memory, I/O) SDN ,SDS	8Hrs
• Introduction to Storage Systems. Cloud Storage ConceptsDistributed File Systems (HDFS, Ceph FS) Cloud Databases (HBase, MongoDB, Cassandra, DynamoDB)	8Hrs
• Distributed Programming for the Cloud. Data-Parallel Analytics with Hadoop MapReduce (YARN) Graph-Parallel Analytics with GraphLab 2.0 (PowerGraph)	8Hrs

Vishwatmak Jangali Maharaj Trust's

Vishwatmak Om Gurudev College of Engineering

Department Of Computer Engineering

Date:12 /8/2019

NOTICE

All students are hereby informed that our Department is going to start a **ADD ON COURSE ON CLOUD COMPUTING** from **26 th august** to **30 th august** 2019 for their benefits in the near future.

The last date of enrollment is :- 22/8/2019

Note:
1. The course is free of cost and the successful candidates will be issued certificates by the college which will help them in future.

2. Admission is on First Come First Serve Basis. Number of seats is limited.

Name of Course	:	**Add on course on Cloud computing**		
Duration	:	40 Hrs	Modules :	3

Course Objectives :

In this course we plan to give students an overview of the field of Cloud Computing, and an in-depth the fundamental ideas behind Cloud Computing, the evolution of the paradigm, its applicability;benefits, as well as current and future challenges;the basic ideas and principles in data center design; cloud management techniques and cloud software deployment considerations;different CPU, memory and I/O virtualization techniques that serve in offering software, computation and storage services on the cloud; Software Defined Networks (SDN) and Software Defined Storage (SDS); cloud storage technologies and relevant distributed file systems, NoSQL databases and object storage;the variety of programming models and develop working experience in several of them.

Course Outcomes :

The primary learning outcomes of this course are five-fold. Students will be able to:

1) Explain the core concepts of the cloud computing paradigm: how and why this paradigm shift came about, the characteristics, advantages and challenges brought about by the various models and services in cloud computing.

2) Apply fundamental concepts in cloud infrastructures to understand the tradeoffs in power, efficiency and cost, and then study how to leverage and manage single and multiple datacenters to build and deploy cloud applications that are resilient, elastic and cost-efficient.

3) Discuss system, network and storage virtualization and outline their role in enabling the cloud computing system model.

4) Illustrate the fundamental concepts of cloud storage and demonstrate their use in storage systems such as Amazon S3 and HDFS.

5) An.alyze various cloud programming models and apply them to solve problems on the cloud

Course Pre-requisites :

- Pre-requisites for undergraduate students: A "C" or better in 15-213.
- Pre-requisites for graduate students: Knowledge of computer systems, programming and debugging, with a strong competency in at least one language (such as Java/Python), and the ability to pick up other languages as needed

Career Prospects:

Students will work in teams to design and implement a complete web-service that uses the REST interfaceto respond to queries that require running an analytics job on a large (1TB) twitter data set which is stored in a database (MySQL, HBASE, etc.). In this team project, student teams are expected to use differenttools and services to achieve build a performing web-service that meets the requirements. The students'web-services are evaluated through a load generator for a fixed time period (several hours) by measuring the cost of AWS cloud resources used and their system's performance (throughput). There is an upper bound on the budget which could cause students to be disqualified. Students are evaluated based on how their service performs compared to a baseline

Course Contents		
Module-1 :	**Duration :**	**14 hours**

Introduction

Definition and evolution of Cloud Computing.

Enabling Technologies, Service and Deployment Models, Popular Cloud Stacks and Use Cases.

Benefits, Risks, and Challenges of Cloud Computing.

Economic Models and SLAs.

Topics in Cloud Security.

Module-2 :	**Duration :**	**13 hours**

Cloud Infrastructure and Virtualization

Historical Perspective of Data Centers

Datacenter Components: IT Equipment and Facilities

Design Considerations: Requirements, Power, Efficiency, & Redundancy

Power Calculations, PUE and Challenges in Cloud Data Centers

Cloud Management and Cloud Software Deployment Considerations.

Virtualization (CPU, Memory, I/O)

Case Study: Amazon EC2

Software Defined Networks (SDN)

Software Defined Storage (SDS)

Module-3 :	**Duration :**	**13 hours**

Cloud Storage and Programming Models

Introduction to Storage Systems

Cloud Storage Concepts

Distributed File Systems (HDFS, Ceph FS)

Cloud Databases (HBase, MongoDB, Cassandra, DynamoDB)

Cloud Object Storage (Amazon S3, OpenStack Swift, Ceph)

Distributed Programming for the Cloud

Data-Parallel Analytics with Hadoop MapReduce (YARN)

iterative Data-Parallel Analytics with Apache Spark

Graph-Parallel Analytics with GraphLab 2.0 (PowerGraph)

Presentations and test followed by Course Completion.

Respected Sir,

Our Institute Vishwatmak Jangali Maharaj ashram trust's **Vishwatmak Om Gurudev College of Engineering** is approved by AICTE New Delhi, recognized by DTE, Maharashtra State& affiliated to **Maharashtra State Board of technical Education Mumbai.** As a part of curriculum, we required to arrange an **ADD ON COURSE ON CLOUD COMPUTING** for students .We would like to invite you on for guiding our students. Kindly send the consent & provide the appropriate time/date.

Thank you for consideration.

With warm regard,

Head of Computer Dept,
VOGCE

Nashik

Respected Sir,

We are gradually thankful for sharing great knowledge and addressing our students on **ADD ON COURSE ON CLOUD COMPUTING** from **26 th august to 30 th august 2019** . We all hope that you will allow us for such kind of other visit to our students and guide them as well. This will definitely boost knowledge about to our students. we hope it was a positive experience for you as well.

Thank you once again for association with us & sharing the knowledge and given precious time for us. We look forward to a long and fruitful association with you.

With warm regard,
