EVERYTHING YOU NEED TO KNOW ABOUT PYTHON

Course Objectives :

- Master the fundamentals of writing Python scripts
- Learn core Python scripting elements such as variables and flow control structures
- Discover how to work with lists and sequence data
- Write Python functions to facilitate code reuse
- Use Python to read and write files
- Make their code robust by handling errors and exceptions properly
- Work with the Python standard library
- Explore Python's object-oriented features
- Search text using regular expressions

Course Outcomes :

When students complete Intro to Programming with Python, they will be able to: Build basic programs using fundamental programming constructs like variables, conditional logic, looping, and functions. Work with user input to create fun and interactive programs.

Resource Person :- Mr.Santosh
Bhishe

Coordinator :- Prof. pooja shinde

Course Pre-requisites :

Students should already be comfortable using the operating system (Linux, Unix, Windows, Solaris, macOS, etc.) on which they will be running Python. While not mandatory, basic skills with at least one other programming language are desirable.

Career Prospects:

Well for one Python scope is intensive in data science and analysis. Clients often want hidden patterns extracted from their data pools. It is also preferred in machine learning and artificial intelligence. Data scientists love Python. Also, in our article on applications of Python, we read about how Python is used everywhere in web development, desktop applications, data science, and network programming.

Course Contents :

- Introduction to Python Language. 4Hrs
- Features, the advantages of Python over other programming languages 6Hrs
- Python installation – Windows, Mac & Linux distribution for Anaconda Python 6Hrs
- Deploying Python IDE Basic Python commands, data types, variables, keywords and more Built-in data types in Python 6Hrs
- Learn classes, modules, Str(String), Ellipsis Object, Null Object, Ellipsis, Debug Basic operators, comparison, arithmetic, slicing and slice operator, logical, bitwiseLoop and control statements while, for, if, break, else, continue 6Hrs
- Understanding the Database, need of database installing MySQL on windows 6Hrs
- Understanding Database connection using Python.Hands-on Exercise – Demo on Database Connection using python and pulling the data. 6Hrs
